1. Use Case Diagram

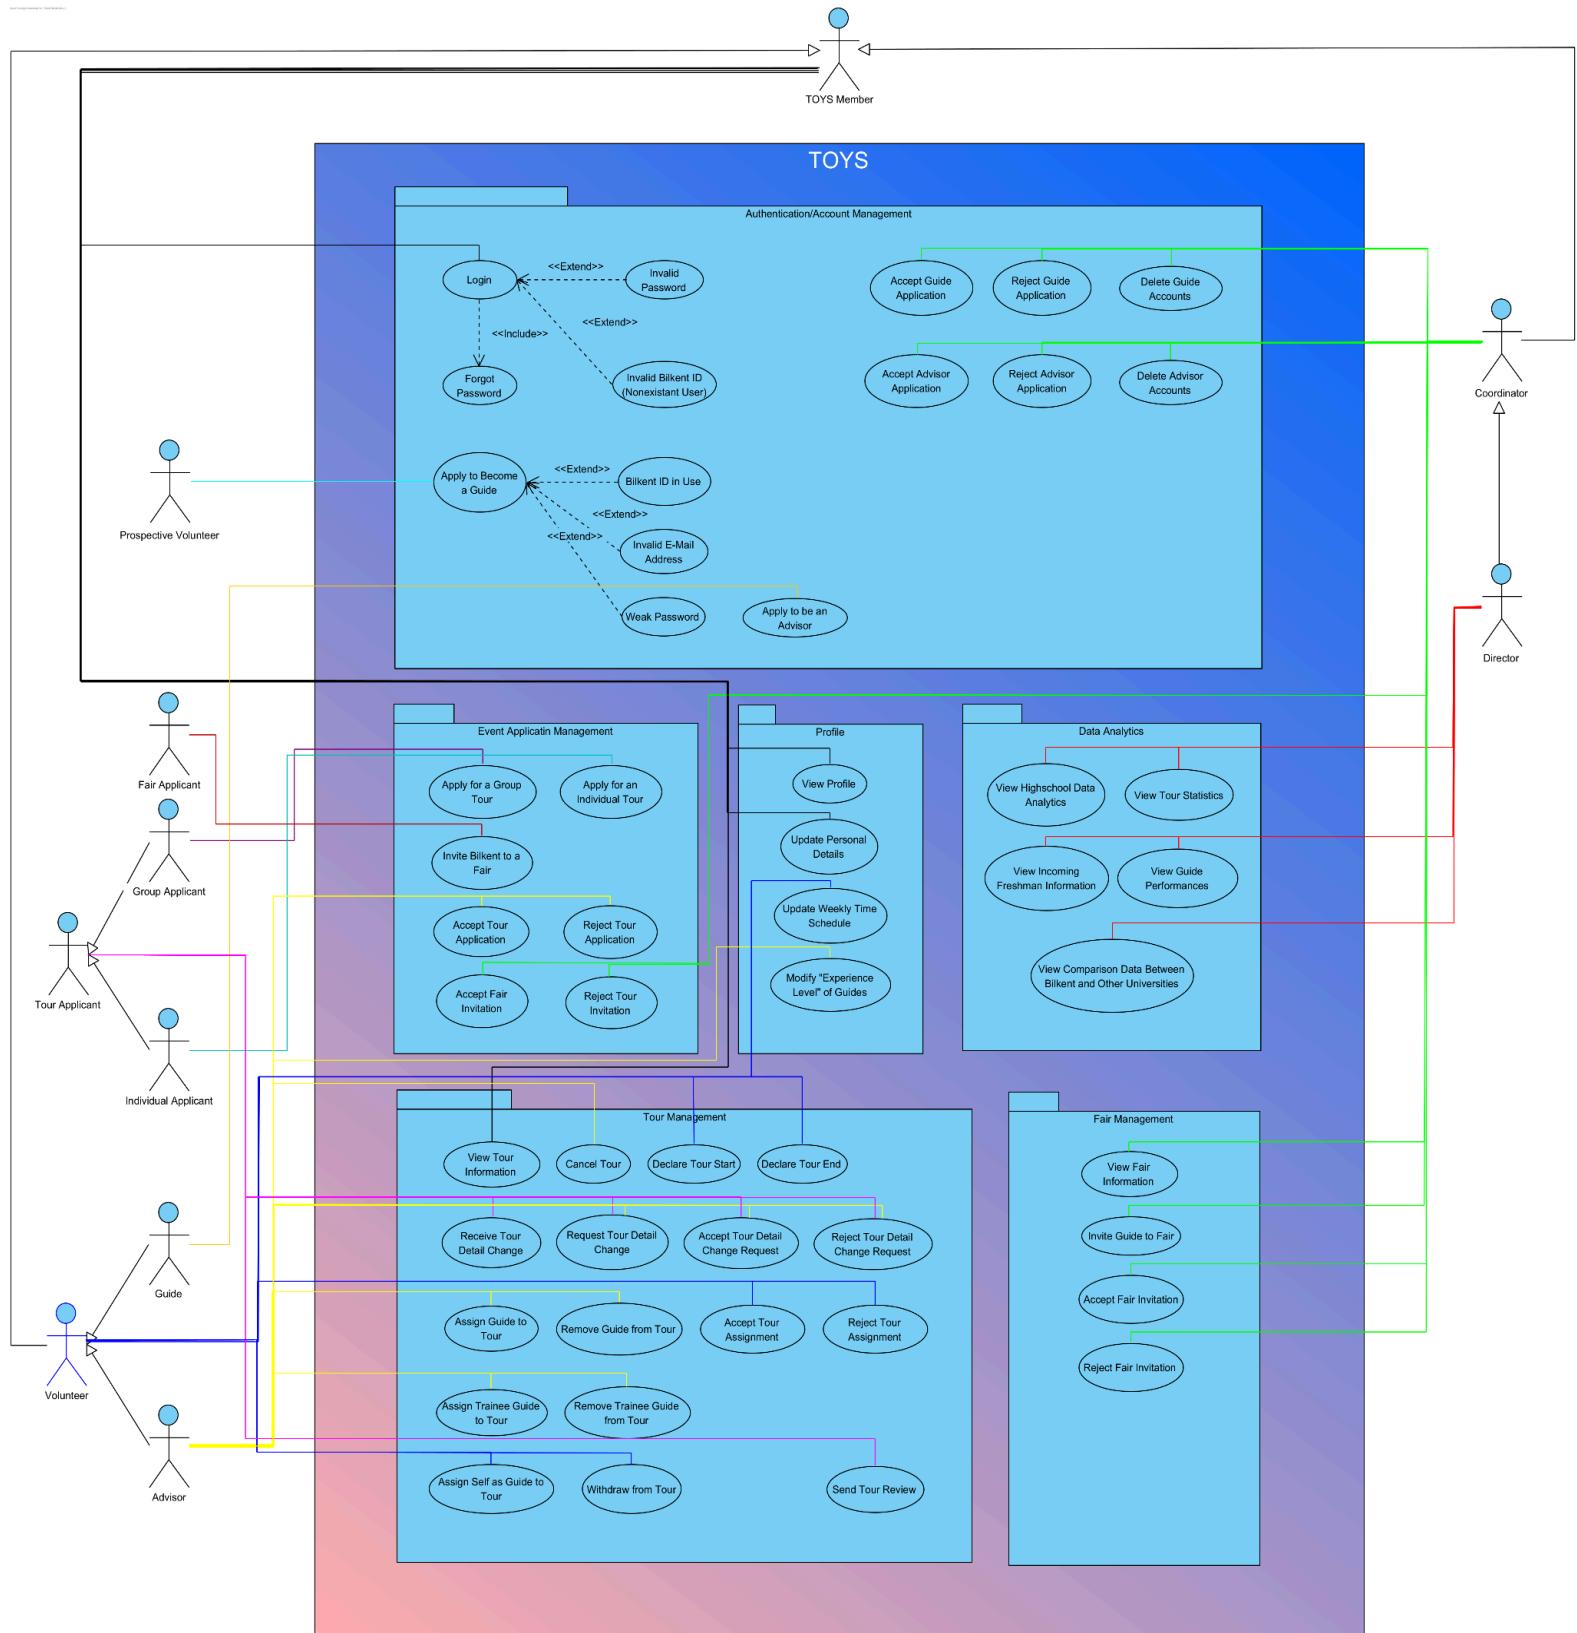

Figure 1: Use case diagram for TOYS.

2. Textual Use Case Description

USE CASE CATEGORY: AUTHENTICATION / APPLICATION MANAGEMENT

Use Case Name: Login

Participating Actors: TOYS Member

Flow of Events:

1. User clicks the login button.
2. User enters their Bilkent ID and their password
3. User clicks the Login button
4. User successfully logs in.

Extensions:

1. If the user enters an invalid password, they cannot log in and are redirected to the login page.
2. If the user enters an invalid Bilkent ID, they cannot log in and are redirected to the login page.

Entry Conditions:

1. Opening the TOYS webpage.
2. Clicking the Login button.

Exit Conditions:

1. User enters an invalid password and cannot log in.
2. User enters an invalid Bilkent ID and cannot log in.
3. User enters both credentials correctly and they successfully log in.

Special / Quality Requirements:

1. Password should be encrypted.

Use Case Name: Forgot Password

Participating Actors: TOYS Member (Inherited from Login)

Flow of Events:

1. User enters the login page.
2. User clicks the “Forgot Password” button.
3. User enters their email inside a pop-up.
4. User is redirected to a password reset page from a link in their email.
5. User enters their new password twice.
6. User clicks the “Reset Password” button.

Entry Conditions:

1. User clicks the “Forgot Password” button on the login page.

Exit Conditions:

2. User enters their new password and their password is reset.

Special / Quality Requirements:

1. There is a once per 5 minute rate limit on the forgot password functionality.

Use Case Name: Apply to Become a Guide**Participating Actors:** Prospective Volunteer**Flow of Events:**

1. Prospective volunteer clicks the “Become a Guide” button on the login page.
2. Prospective volunteer enters their Bilkent ID, Bilkent E-mail, name, surname, phone, and password.
3. Prospective volunteer clicks “Create an Account”
4. Prospective volunteer is informed that their application is received on a separate page.

Extensions:

1. If the Bilkent ID that the prospective volunteer provides is already registered, the application does not go through and a warning appears.
2. If the email that the prospective volunteer provides is invalid, the application does not go through and a warning appears.
3. If the password that the prospective volunteer provides is weak (less than 6 characters long), the application does not go through and a warning appears.

Entry Conditions:

1. Prospective volunteer clicks the “Become a Guide” button on the login page.

Exit Conditions:

1. Prospective volunteer provides all details correctly and is informed their application is received on a separate page.
2. Prospective volunteer provides either an invalid email address, a Bilkent ID already in use, or a weak password and their application is not received and the prospective volunteer receives a warning.

Special / Quality Requirements:

1. There should be a rate limit of once per 30 seconds on applying to become a guide to mitigate malicious attacks.

Use Case Name: Accept Guide Application

Participating Actors: Coordinator, Director

Flow of Events:

1. Participating actor clicks the “Applications” button on their navbar.
2. Participating actor clicks on “Amateur Guide Applications” tab.
3. Participating actor clicks the Approve button on the listed application to become a Guide.

Entry Conditions:

1. Having logged in as a Coordinator or a Director.
2. Viewing the “Amateur Guide Applications” tab on the “Applications” page.

Exit Conditions:

1. Participating actor clicking the “Approve” button on the application listed on the Amateur Guide Applications tab on the Applications page.

Special / Quality Requirements:

1. Approve button appearing on the card of the application makes it **convenient** by eliminating the need to route to the Application details page.

Use Case Name: Reject Guide Application

Participating Actors: Coordinator, Director

Flow of Events:

1. Participating actor clicks the “Applications” button on their navbar.
2. Participating actor clicks on “Amateur Guide Applications” tab.
3. Participating actor clicks the Reject button on the listed application to become a Guide.

Entry Conditions:

1. Having logged in as a Coordinator or a Director.
2. Viewing the “Amateur Guide Applications” tab on the “Applications” page.

Exit Conditions:

1. User clicking the “Reject” button on the application listed on the Amateur Guide Applications tab on the Applications page.

Special / Quality Requirements:

1. Reject button appearing on the card of the application makes it **convenient** by eliminating the need to route to the Application details page.

Use Case Name: Delete Guide Accounts

Participating Actors: Coordinator, Director

Flow of Events:

1. Participating Actor clicks the “Manage Personnel” button on their Navbar.
2. Participating Actor clicks the “Guides” tab on the “Manage Personnel” page.
3. Participating Actor clicks the card of the guide to be deleted.
4. Participating Actor is redirected to the Guide’s profile.
5. Participating Actor clicks the “Delete Guide” button.
6. Participating Actor clicks the “Delete” button on the overlay asking if they are sure deleting the Guide.
7. Guide is deleted.

Entry Conditions:

1. Having logged in as a Coordinator or a Director.
2. Viewing the Guide’s profile page.

Exit Conditions:

1. Participating Actor clicks “Delete” on the overlay asking if they are sure and the guide is deleted.
2. Participating Actor clicks “Cancel Deletion” on the overlay asking if they are sure and they are redirected to the Guide’s profile page.\

Special / Quality Requirements:

1. Different types of personnel (e.g. Guides and Amateur Guides) being separated into different tabs increases **usability**.

Use Case Name: Accept Advisor Application

Participating Actors: Coordinator, Director

Flow of Events:

1. Participating actor clicks the “Applications” button on their navbar.
2. Participating actor clicks on “Advisor Applications” tab.
3. Participating actor clicks the Approve button on the listed application to become an Advisor.

Entry Conditions:

1. Having logged in as a Coordinator or a Director.
2. Viewing the “Advisor Applications” tab on the “Applications” page.

Exit Conditions:

1. Participating actor clicking the “Approve” button on the application listed on the Advisor Applications tab on the Applications page.

Special / Quality Requirements:

1. Different applications (Guide, Amateur Guide, and Advisor) being separated into different tabs improves **usability**.

Use Case Name: Reject Advisor Application**Participating Actors:** Coordinator, Director**Flow of Events:**

1. Participating actor clicks the “Applications” button on their navbar.
2. Participating actor clicks on “Advisor Applications” tab.
3. Participating actor clicks the Reject button on the listed application to become an Advisor.

Entry Conditions:

1. Having logged in as a Coordinator or a Director.
2. Viewing the “Advisor Applications” tab on the “Applications” page.

Exit Conditions:

1. Participating actor clicking the “Reject” button on the application listed on the Advisor Applications tab on the Applications page.

Special / Quality Requirements:

1. Different applications (Guide, Amateur Guide, and Advisor) being separated into different tabs improves **usability**.

Use Case Name: Delete Guide Accounts**Participating Actors:** Coordinator, Director**Flow of Events:**

1. Participating Actor clicks the “Manage Personnel” button on their Navbar.
2. Participating Actor cliks the “Advisors” tab on the “Manage Personnel” page.
3. Participating Actor clicks the card of the guide to be deleted.
4. Participating Actor is redirected to the Advisor’s profile.
5. Participating Actor clicks the “Delete Advisor” button.
6. Participating Actor clicks the “Delete” button on the overlay asking if they are sure deleting the Advisor.
7. Advisor is deleted.

Entry Conditions:

1. Having logged in as a Coordinator or a Director.
2. Viewing the Advisor's profile page.

Exit Conditions:

1. Participating Actor clicks "Delete" on the overlay asking if they are sure and the advisor is deleted.
2. Participating Actor clicks "Cancel Deletion" on the overlay asking if they are sure and they are redirected to the Advisor's profile page.

Special / Quality Requirements:

1. Different applications (Guide, Amateur Guide, and Advisor) being separated into different tabs improves **usability**.

Use Case Name: Apply to be an Advisor**Participating Actors:** Guide**Flow of Events:**

1. Participating actor clicks the Profile page on their navbar.
2. Participating actor clicks the "Apply to be an Advisor" button on their Profile page.
3. Participating actor is redirected to their profile.

Entry Conditions:

1. Having logged in as a Guide.
2. Participant actor viewing their own profile.

Exit Conditions:

1. Participating actor clicks the "Apply to be an Advisor" button.

Special / Quality Requirements:

1. "Apply to be an Advisor" button being on a frequently visited page like the Profile page increases **convenience**.

USE CASE CATEGORY: DATA ANALYTICS**Use Case Name:** View Highschool Data Analytics**Participating Actors:** Director**Flow of Events:**

1. Participating actor clicks "Highschools in Turkey" button in the Navbar
2. Participating actor is redirected to the Highschool list page.

3. Participating actor searches the highschool that they are interested in.
4. Participating actor clicks the highschool that comes as a result.
5. Participating actor is redirected to that highschool's analytics page.

Entry Conditions:

1. Being logged in as a Director.
2. Being on the highschool data analytics page.

Exit Conditions:

1. The highschool being searched does not exist in the system and no search results come up.
2. Participating actor successfully reaches and visits the highschool data analytics page.

Special / Quality Requirements:

1. When there are no results for highschools, "No results" should write on the results part.

Use Case Name: View Tour Statistics

Participating Actors: Director

Flow of Events:

1. Participating Actor clicks on "Completed Tours" on their navbar.
2. Participating Actor can search the school or Guide name on a list showing all tours.
3. Participating Actor clicks their tour of interest.
4. Participating Actor is redirected to that tour's review page.

Entry Conditions:

1. Being logged in as a Director.
2. Being on that tour page.

Exit Conditions:

1. Tour of interest does not exist.
2. Tour review page is being viewed.

Special / Quality Requirements:

1. When there are no results for highschools, "No results" should write on the results part.

Use Case Name: View Incoming Freshman Information

Participating Actors: Director

Flow of Events:

1. Participating actor clicks on “Bilkent Students” in the navbar
2. Participating actor is redirected to the Bilkent Data page.
3. Participating actor is presented with information about the incoming students to the Bilkent

Entry Conditions:

1. Being logged in as a Director.
2. Being on the Bilkent Data page

Exit Conditions:

1. Participating actor leaves the Bilkent Data page.

Special / Quality Requirements:

1. If there is a problem with fetching the data, there must be a “Problem with fetching data” warning displayed.

Use Case Name: View Guide Performances

Participating Actors: Director

Flow of Events:

1. Director clicks on “Manage Personnel” on the navbar.
2. Director clicks on the Guide tab.
3. Director searches for the Guide they want to view (optional)
4. Director clicks on the card of their guide of interest.
5. Director can view Guide Performance in the Guide’s profile.

Entry Conditions:

1. Being logged in as a Director
2. Being on the Guide’s profile.

Exit Conditions:

1. Leaving the Guide’s page.

Special / Quality Requirements:

1. If there are no search results for the Guides, a “No results” warning must display.

Use Case Name: View Comparison Data Between Bilkent and Other Universities

Participating Actors: Director

Flow of Events:

1. Participating actor clicks “Competitors of Bilkent” on the Navbar.
2. Participating actor selects the Bilkent department to be compared.
3. Participating actor selects the other university to be compared.
4. Participating actor selects the other university’s department to be compared.
5. Participating actor can view comparison statistics.

Entry Conditions:

1. Being logged in as a Director.
2. Being on the Comparison page.

Exit Conditions:

1. Leaving the Comparison page.

Special / Quality Requirements:

1. Participating actor should not be able to select a department that does not exist at a university.
2. Fetching data results should not take more than a minute.

USE CASE CATEGORY: TOUR MANAGEMENT

Use Case Name: View Tour Information

Participating Actor: TOYS Member

Flow of Events:

1. Participating actor clicks on “All Tours” from the navbar.
2. Participating actor searches for their tour of interest.
3. Participating actor clicks on the card for their tour of interest
4. Participating actor is redirected to the info page for that tour.

Entry Conditions:

1. Being on the Tour page.
2. Being logged in as a TOYS Member.

Exit Conditions:

1. Leaving the Tour page.

Special / Quality Requirements:

1. No one other than a logged in TOYS Member should be able to access tour information.

Use Case Name: Cancel Tour

Participating Actor: Advisor

Flow of Events:

1. Participating actor goes to the tour page of interest.
2. Participating actor presses the cancel tour button.
3. The tour's status is updated to canceled.

Entry Conditions:

1. Being on the tour page.
2. Being logged in as an Advisor.

Exit Conditions:

1. Leaving the tour page.

Special / Quality Requirements: Cancel button is reliably shown for tours that have not been already cancelled in the spirit of **usability**.

Use Case Name: Declare Tour Start

Participating Actor: Volunteer

Flow of Events:

1. Participating actor goes to the tour page of interest.
2. Participating actor presses the "Started At" field to set the start time to the current system time.
3. Participating actor presses the "Confirm" button.
4. The "Started At" field is updated with the new time.

Entry Conditions:

1. Being on the tour page.
2. Being logged in as a Volunteer.
3. Being a Volunteer responsible for the tour of interest.

Exit Conditions:

1. Leaving the tour page without confirming the new time.

Special / Quality Requirements: Confirm button is reliably shown for only Tours that have not been declared started yet, and whose time is close to the current time in the spirit of **reliability**.

Use Case Name: Declare Tour End

Participating Actors: Volunteer

Flow of Events:

1. Participating actor goes to the tour page of interest.
2. Participating actor presses the “Ended At” field to set the start time to the current system time.
3. Participating actor presses the “Confirm” button.
4. The “Ended At” field is updated with the new time.

Entry Conditions:

1. Being on the tour page.
2. Being logged in as a Volunteer.
3. Being a Volunteer assigned with the tour of interest.
4. Tour start already being declared.

Exit Conditions:

1. Leaving the tour page without confirming the new time.

Special / Quality Requirements: Ended At field should appear editable only to the actors with the permission to change it in the spirit of **security**.

Use Case Name: Receive Tour Detail Change

Participating Actors: Tour Applicant

Flow of Events:

1. Participating actor receives an E-Mail detailing the requested changes with a link to the tour page.

Entry Conditions:

1. Being a tour applicant.

Exit Conditions:

1. Leaving the E-Mail.

Special / Quality Requirements: Tour application link being sent to the email provided improves **verifiability**.

Use Case Name: Request Tour Detail Change

Participating Actors: Tour Applicant, Advisor

Flow of Events:

1. Participating actor goes to the tour page of interest.
2. Participating actor presses the modifies the “Start Time” field to set the start time to their new requested start time.
3. Participating actor presses the “Send Modification Request” button.

Entry Conditions:

1. Being on the tour page.
2. Being logged in as an advisor OR being a tour applicant.
3. Being a supervisor OR an applicant for the tour of interest.

Exit Conditions:

1. Leaving the page without pressing the “Send Modification Request” button.

Special / Quality Requirements: Decline button reliably appears only on the tour detail change requests that have not been declined already.

Use Case Name: Accept Tour Detail Change Request

Participating Actor: Tour Applicant, Advisor

Flow of Events:

1. Participating actor goes to the tour page of interest.
2. Participating actor presses “Accept” button near the new date and time text.

Entry Conditions:

1. Being on the tour page.
2. Being logged in as an advisor OR being a tour applicant.
3. Being a supervisor OR an applicant for the tour of interest.

Exit Conditions:

1. Leaving the page without pressing the “Accept” button.

Special / Quality Requirements: Accept button reliably appears only on the tour detail change requests that have not been accepted already.

Use Case Name: Decline Tour Detail Change Request

Participating Actor: Tour Applicant, Advisor

Flow of Events:

1. Participating actor goes to the tour page of interest.
2. Participating actor presses “Decline” button near the new date and time text.

Entry Conditions:

1. Being on the tour page.
2. Being logged in as an advisor OR being a tour applicant.
3. Being a supervisor OR an applicant for the tour of interest.

Exit Conditions:

1. Leaving the page without pressing the “Decline” button.

Special / Quality Requirements: Decline button reliably appears only on the tour detail change requests that have not been declined already.

Use Case Name: Assign Guide to Tour

Participating Actors: Advisor

Flow of Events:

1. Participating Actor enters the Tour page that has been confirmed and is at a future date.
2. Participating Actor clicks “Manage Guides”.
3. Participating Actor is redirected to the guide assignment multi-stage form page.
4. Participating Actor selects a time slot from the ones deemed available by the applicant.
5. Participating Actor selects an available guide from the available guides list.
6. Participating Actor selects an amateur guide that should tag along the tour (optional).
7. Participating Actor is informed that the assignment is done.

Entry Conditions:

1. Being logged in as an Advisor.
2. Being on the Tour page.
3. Clicking on the Manage Guides button on the Tour page.

Exit Conditions:

1. Leaving the Tour page.
2. There are no available guides.

Special / Quality Requirements:

1. Participating actor will be textually **warned** if there are no available guides.

Use Case Name: Remove Guide from Tour

Participating Actors: Advisor

Flow of Events:

1. Participating actor clicks on the “Manage Guides” button on the tour page.
2. Participating actor clicks on the Guide to be removed.
3. Participating actor is informed that the Guide is removed with an Info card.

Entry Conditions:

1. Being logged in as Advisor.
2. Clicking the Manage Guides button on the tour page.

Exit Conditions:

1. Leaving the Manage Guides page.

Special / Quality Requirements:

1. Advisor should have a visual cue (participating guides are highlighted) which guide is assigned or not.

Use Case Name: Accept Tour Assignment

Participating Actors: Volunteer

Flow of Events:

1. Participating actor clicks on Dashboard from their navbar.
2. Participating actor clicks on a Tour from the “Assigned Events” tab
3. Participating actor is redirected to the tour page.
4. Participating actor views the details of the assignment on the Tour page.
5. Participating actor accepts the tour assignment by clicking on the Accept button.

Entry Conditions:

1. Being logged in as a Volunteer (Advisor or Guide).
2. Being on the Tour page

Exit Conditions:

1. Clicking the Accept button.

Special / Quality Requirements:

1. Accept button consistently should only be visible to the Volunteer that is requested to be on the tour.

Use Case Name: Reject Tour Assignment

Participating Actors: Volunteer

Flow of Events:

1. Participating actor clicks on Dashboard from their navbar.
2. Participating actor clicks on a Tour from the “Assigned Events” tab
3. Participating actor is redirected to the tour page.
4. Participating actor views the details of the assignment on the Tour page.
5. Participating actor rejects the tour assignment by clicking on the Reject button.

Entry Conditions:

1. Being logged in as a Volunteer (Advisor or Guide).
2. Being on the Tour page.

Exit Conditions:

1. Clicking the Reject button.

Special / Quality Requirements:

1. Reject button consistently should only be visible to the Volunteer that is requested to be on the tour.

Use Case Name: Assign Trainee Guide to Tour

Flow of Events:

1. Participating Actor enters the Tour page that has been confirmed and is at a future date.
2. Participating Actor clicks “Manage Guides”.
3. Participating Actor is redirected to the guide assignment multi-stage form page.
4. Participating Actor selects a time slot from the ones deemed available by the applicant.
5. Participating Actor selects an available guide from the available guides list.
6. Participating Actor selects an amateur guide that should tag along the tour.
7. Participating Actor is informed that the assignment is done.

Entry Conditions:

1. Being logged in as an Advisor.
2. Being on the Tour page.
3. Clicking on the Manage Guides button on the Tour page.

Exit Conditions:

1. Leaving the Tour page.
2. There are no available guides.

Special / Quality Requirements:

1. Participating actor will be textually **warned** if there are no available trainee guides.

Use Case Name: Remove Guide from Tour

Participating Actors: Advisor

Flow of Events:

1. Participating actor clicks on the “Manage Guides” button on the tour page.
2. Participating actor clicks on the trainee guide to be removed.
3. Participating actor is informed that the trainee guide is removed with an Info card.

Entry Conditions:

1. Being logged in as Advisor.
2. Clicking the Manage Guides button on the tour page.

Exit Conditions:

1. Leaving the Manage Guides page.

Special / Quality Requirements:

1. Advisor should have a visual cue (participating guides are highlighted) which trainee guide is assigned or not.

Use Case Name: Assign Self as Guide to Tour

Participating Actors: Volunteer

Flow of Events:

1. Participant actor opens the tour page.
2. Participant actor clicks on the “Apply” button.

Entry Conditions:

1. Being logged in as a Volunteer (Guide or Advisor).
2. Being on the Tour page.

Exit Conditions:

1. Leaving the Tour page.

Special / Quality Requirements:

1. Apply button should consistently be visible only to Volunteers who are not already a guide for that tour and for tours that are future dated.

Use Case Name: Withdraw from Tour

Participating Actors: Volunteer

Flow of Events:

1. Participant actor opens the tour page.
2. Participant actor clicks on the “Withdraw” button.

Entry Conditions:

1. Being logged in as a Volunteer (Guide or Advisor).
2. Being on the Tour page.

Exit Conditions:

1. Leaving the Tour page.

Special / Quality Requirements:

1. Withdraw button should consistently be visible only to Volunteers who are not already a guide for that tour and for tours that are future dated.

Use Case Name: Send Tour Review**Participating Actors:** Tour Applicant**Flow of Events:**

1. Participating actor receives an email prompting them to review their tour.
2. Participating actor follows the link in the email.
3. Participating actor selects their impression of Bilkent from a dropdown.
4. Participating actor gives a star rating and writes a tour.
5. Participating actor clicks the Send button.

Entry Conditions:

1. Having attended and completed a tour with the Tanıtım Ofisi.
2. Not having already sent a review.

Exit Conditions:

1. Clicking the send button.
2. Closing the email without following link.
3. Closing the tour review page without clicking the Send button.
4. Hypersonic alien missiles destroying the entirety of the life on Planet Earth before being able to click the Send button.

Special / Quality Requirements:

1. Same person should not be able to send multiple reviews.

USE CASE CATEGORY: FAIR MANAGEMENT**Use Case Name:** View Fair Information**Participating Actors:** Coordinator**Flow of Events:**

1. Coordinator clicks on the All Fairs on the navbar.
2. Coordinator views the info of the fairs as listed.

Entry Conditions:

1. Being logged in as Coordinator.
2. Being on the All Fairs page.

Exit Conditions:

1. Leaving the All Fairs Page.

Special / Quality Requirements:

1. Past and future fairs should be filterable, with future fairs appearing on top by default.

Use Case Name: Invite Guide to Fair

Participating Actors: Coordinator

Flow of Events:

1. Participating actor clicks on All Fairs on their navbar.
2. Participating actor clicks on Manage Guides on the card of the fair of interest.
3. Participating actor clicks on their selection of available guides to attend the fair.

Entry Conditions:

1. Being logged in as Coordinator.
2. Being on the All Fairs page.

Exit Conditions:

1. Leaving the All Fairs page.

Special / Quality Requirements:

1. If there are no available guides, a warning should appear.

Use Case Name: Accept Fair Invitation

Participating Actors: Coordinator

Flow of Events:

1. Participating actor clicks on All Fairs on their navbar.
2. Participating actor clicks on the Accept button on the card of the fair of interest.

Entry Conditions:

1. Being logged in as Coordinator.
2. Being on the All Fairs page.

Exit Conditions:

1. Leaving the All Fairs page.

Special / Quality Requirements:

1. The Accept button should consistently be visible for only Tours that have not been accepted already.

Use Case Name: RejectFair Invitation

Participating Actors: Coordinator

Flow of Events:

1. Participating actor clicks on All Fairs on their navbar.
2. Participating actor clicks on the Reject button on the card of the fair of interest.

Entry Conditions:

1. Being logged in as Coordinator.
2. Being on the All Fairs page.

Exit Conditions:

1. Leaving the All Fairs page.

Special / Quality Requirements:

1. The Reject button should consistently be visible for only Tours that have not been accepted already.

Use Case Name: Apply for a Group Tour

Participating Actor: Tour Applicant → Group Applicant

Entry Condition: Applicant visits the web page to apply to the group tour

Exit Condition: Applicant completed a group application

Flow of Events:

- Applicant enters the page and clicks the “Request Group Tour” button
- Applicant enters information about the teacher leading the group and the school
- Applicant picks three dates and time slots that are available
- Applicant enters the number of attendees in the group and any other notes they want to give
- Applicant completes the application

Special/Quality Requirements: For **reliability** reasons, the form will check that all fields are filled and contain relevant information before it can be submitted. In addition, the validity of the form will be checked in the back-end and the applicant will be informed via mail whether or not their application was valid and received. Moreover, school selection and responsible teacher role selection will be done via dropdown menus to ensure that the applicants are applying from real schools and responsible group leaders will be teachers. Real-time validation and error messages will be given to guide users if certain fields are entered wrongly or are empty (e.g. email field).

Use Case Name: Apply for an Individual Tour

Participating Actor: Tour Applicant → Individual Applicant

Entry Condition: Applicant visits the web page to apply to the individual tour

Exit Condition: Applicant completed an individual application

Flow of Events:

1. Applicant enters the page and clicks the “Request Individual Tour” button
2. Applicant enters information about the student attending the tour and their school
3. Applicant picks three dates and time slots that are available
4. Applicant enters any other notes they want to give
5. Applicant completes the application

Special/Quality Requirements: For the reliability criterion, similar to the group tour application, the contents of the form will be checked in the front-end before it can be submitted. The back-end will check the validity of the form to inform the applicant if their application was valid and received. School selection will be done via a dropdown menu to ensure that the applicant chooses a valid school.

Use Case Name: Invite Bilkent to a Fair

Participating Actor: Tour Applicant → Fair Applicant

Entry Condition: Applicant visits the web page to invite Bilkent to a fair

Exit Condition: Applicant completed the fair invitation

Flow of Events:

1. Applicant enters the page and clicks the “Invite to Fair” button
2. Applicant enters the information about themselves and the school
3. Applicant enters the fair date and time
4. Applicant enters the name of the fair and additional notes
5. Applicant completes the application

Special/Quality Requirements: For the reliability criterion, similar to the group and individual tour applications, the contents of the form will be checked in the front-end before it can be submitted. The back-end will check the validity of the form to inform the applicant if their application was valid and received.

Use Case Name: Accept Tour Application

Participating Actor: Coordinator and Advisor

Entry Condition: An applicant made a tour application

Exit Condition: The tour has been accepted

Flow of Events:

1. Advisor or coordinator sees the tour on the dashboard. They check the times that have been requested. The system already shows the available dates during application, so the applicant picks from only the available dates, but the coordinator or advisor can also manually check the dates for any exceptions.
2. The advisor or coordinator can either accept the tour, reject the tour or send a modification request for new dates and times to be picked. In this case, the advisor or coordinator accepts the tour.

Special/Quality Requirements: For the usability criterion, as the software will require that the selected schools are valid, the coordinator or advisor won't have to manually ensure that the schools selected are real.

Use Case Name: Reject Tour Application

Participating Actor: Coordinator and Advisor

Entry Condition: An applicant made a tour application

Exit Condition: The tour has been rejected

Flow of Events:

1. Advisor or coordinator sees the tour on the dashboard. They check the times that have been requested. The system already shows the available dates during application, so the applicant picks from only the available dates, but the coordinator or advisor can also manually check the dates for any exceptions.
2. The advisor or coordinator can either accept the tour, reject the tour or send a modification request for new dates and times to be picked. In this case, the advisor or coordinator rejects the tour.

Special/Quality Requirements: For the usability criterion, as the software will require that the selected schools are valid, the coordinator or advisor won't have to manually ensure that the schools selected are real.

Use Case Name: Accept Fair Application

Participating Actor: Coordinator

Entry Condition: An applicant invited Bilkent to their school

Exit Condition: The fair application has been accepted by the coordinator

Flow of Events:

1. The coordinator sees the fair on the dashboard. They check the time and date that is picked. The system already shows the available dates during application, so the applicant picks from only the available dates, but the coordinator can also manually check the date for any exceptions.
2. The coordinator can either accept the fair or reject the fair. In this case, the coordinator accepts the fair.

Special/Quality Requirements: For the usability criterion, as the software will require that the selected schools are valid, the coordinator won't have to manually ensure that the schools selected are real. Moreover, rejection and acceptance, in addition to the guide assignment for the fairs are done in a single page, allowing the coordinator to complete his/her tasks quickly without needing many clicks.

Use Case Name: Reject Fair Application

Participating Actor: Coordinator

Entry Condition: An applicant invited Bilkent to their school

Exit Condition: The fair application has been rejected by the coordinator

Flow of Events:

1. The coordinator sees the fair on the dashboard. They check the time and date that is picked. The system already shows the available dates during application, so the applicant picks from only the available dates, but the coordinator can also manually check the date for any exceptions.
2. The coordinator can either accept the fair or reject the fair. In this case, the coordinator rejects the fair.

Special/Quality Requirements: For the usability criterion, as the software will require that the selected schools are valid, the coordinator won't have to manually ensure that the schools selected are real. Moreover, rejection and acceptance, in addition to the guide assignment for the fairs are done in a single page, allowing the coordinator to complete his/her tasks quickly without needing many clicks.

Use Case Name: View Profile

Participating Actor: TOYS Member

Entry Condition: The user trying to access their profile is a registered TOYS member

Exit Condition: The user has viewed their profile and requested to navigate to another page/exited the app

Flow of Events:

1. The user navigates to the “Profile” page from the left sidebar. There, they can see their schedule and edit the slots of time they are busy or available.
2. The user can also navigate to the “Edit Personal Information” page through their profile.
3. If the user is a guide, they can apply to become an advisor through their profile.

Special/Quality Requirements: For the usability criterion, within a single page, the TOYS member can do a lot of tasks: editing their schedule, personal information, and applying to become an advisor. Therefore, there won’t be a need for many clicks and redirections, all actions can be navigated to within two clicks.

Use Case Name: Update Personal Details

Participating Actor: TOYS Member

Entry Condition: The user trying to update their information is a registered TOYS member

Exit Condition: The user updated their personal information

Flow of Events:

1. The user can change their information except for their Bilkent ID via this page.

Special/Quality Requirements: Fields such as email field will be checked for validity for the reliability criterion before submitting the form.

Use Case Name: Update Weekly Time Schedule

Participating Actor: Volunteer

Entry Condition: The user has to be a guide or an advisor trying to update their schedule

Exit Condition: The user updated their schedule

Flow of Events:

- The user clicks white slots to make them red and occupied.
- The user clicks red slots to make them white and available.

Special/Quality Requirements: For the usability criterion, the UI to select available and occupied slots will be relatively simple. Clicking on an available slot will make it occupied, and clicking on an occupied slot will make it available.

Use Case Name: Modify “Experience Level” of Guides

Participating Actor: Advisor

Entry Condition: The user has to be an advisor trying to change the experience level of a guide

Exit Condition: The user modified the experience level of the guide

Flow of Events:

- The user modifies the experience level of a guide

Special/Quality Requirements: For the usability criterion, the modification of experience level will relatively easy for the advisor. They will just visit the profile page of the guide and within the click of a button they can change the experience level.

3. Tech Stack

Front-end

React: We picked React because of its popularity in the tech market and that experience with it could help us become relevant in the tech market later on. Furthermore, React enables a good workflow for working with a team since everyone can write separate, modular React components and they can be brought together in the same application. The modular structure of the components and all of them having local variables of their own lends itself good to thinking like they are classes; hence React lends itself more easily to an object-oriented approach.

TypeScript: React can work with either Javascript or TypeScript. We chose TypeScript because by catching type errors in compile time, we could save ourselves time in writing tests and avoid runtime errors that are hard to find.

Tailwind: Tailwind is a CSS framework that allows us to style HTML elements without writing the CSS for them, providing simple CSS classes that can be used to do the styling instead. While not every React component we use will be made by us, with Tailwind the ones we do make will not have to rely on special classes or spreadsheets unless the component requires some really custom effects.

Mantine UI: This is the ready-made component library that we will use. We use this library in order to not "reinvent the wheel"; by using and customizing Mantine UI's components, we will be able to save a lot of time. Since Mantine UI is not a very popular component library like Bootstrap, we decided it would contribute to a unique look in our front-end.

Data Analytics

Python: For the data analytics of our project, we will mainly use Python. We chose Python because of its variety of data manipulation libraries.

For the guide-matching algorithm, we will use libraries such as Pandas and Numpy. Pandas library provides Dataframes and their related methods, which are helpful in manipulating and managing large amounts of data efficiently. Similarly, NumPy involves functionality to carry out advanced mathematical operations on large amounts of data with many fields. Matplotlib may be used for the visualization of graphs and tables, and Scikit-learn may be for various algorithms like guide-matching. Moreover, since web scraping from YÖK Atlas will be required, we will use the scraping framework BeautifulSoup.

Back-end

Java + Spring: Java is used because of its ease of deployment through JAR files and my (Ruşen Ali Yılmaz, the back-end developer of our team) familiarity to it. Spring/Springboot is used to host the API services of the project. It was chosen because it provides necessary functionality through annotation, reduces boilerplate code, and has a wide range of libraries and extensions that we can use in need.

Firebase Firestore: We will also be using Firebase Firestore for our database. The data will be hosted on Google Cloud. Through Firebase's auth system and Firestore's encrypted data storage, a reasonable level of data security and privacy will be reached.

3. Highschool Tour

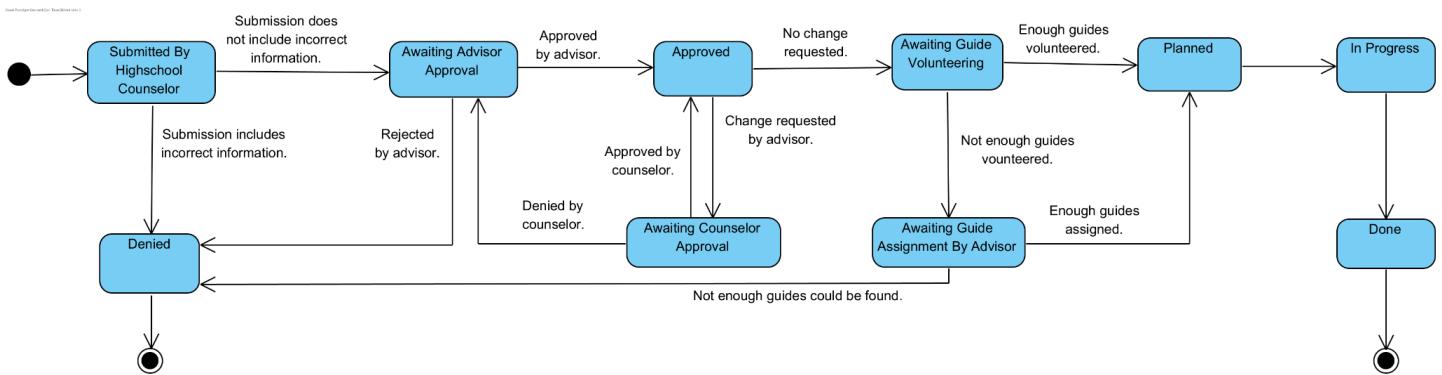

Figure 16: State diagram for high school tours.

4. Individual Tour

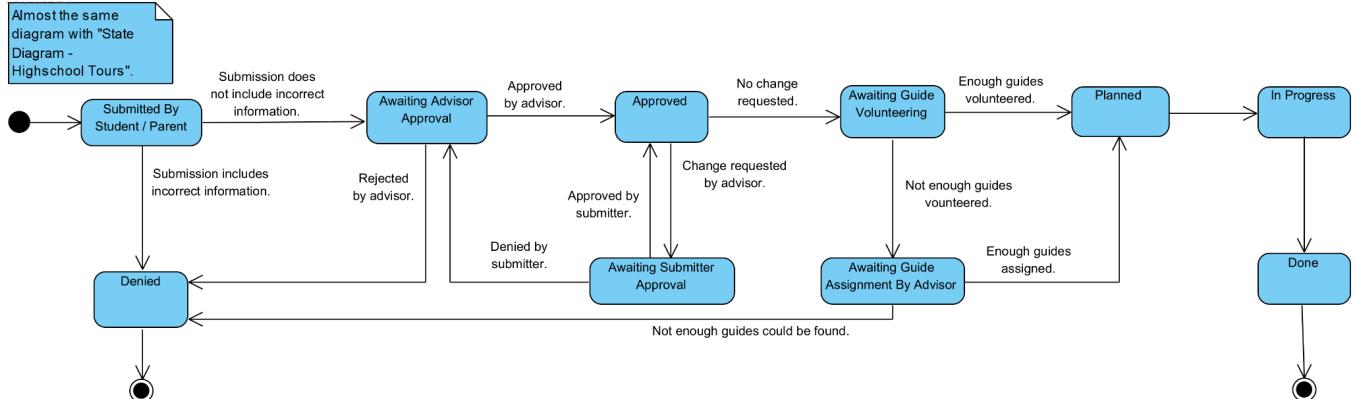

Figure 17: State diagram for individual tours.

5. Guide Accounts

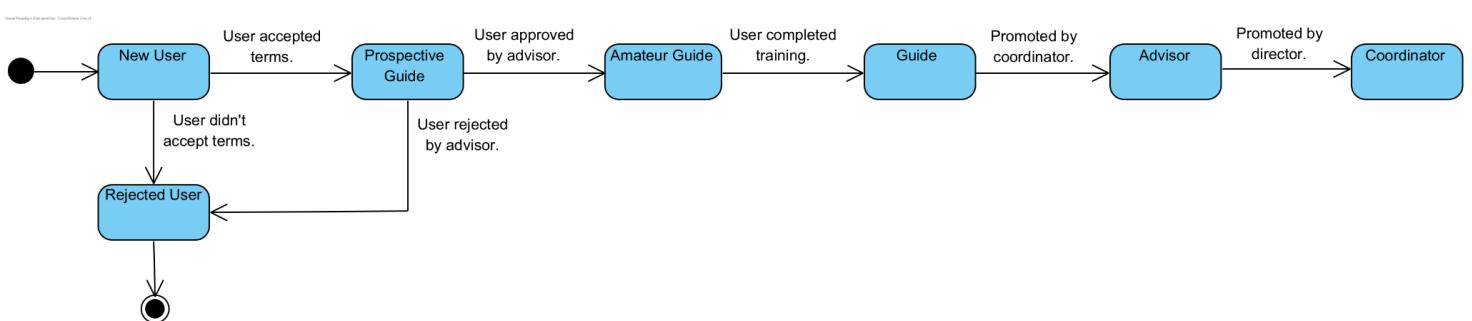

Figure 18: State diagram for guide accounts.

4. Non-functional Requirements

1. Usability

The main purpose of TOYS is to ease the tour management and application processes.

Thus, high usability is one of the key requirements of our project. To achieve this, the following criteria will be met:

- Tour/fair/guide applications can be submitted with redirection to at most 3 pages.
- Tour/fair/guide application reviews, tour/fair change requests, data analysis, and data visualization can be done with at most 6 clicks.
- Every image and chart must have alternative text for visually impaired users.
- Character limitations in long-form text fields of forms must be shown under the text field.
- Rules and requirements for any text field must be shown above the text field.
- Every drop-down menu with more than 6 options must be searchable.

2. Privacy and Security

TOYS will host critical data like managers', guides', and counselors' personal information and tour details. Thus, the privacy and security of these data is important. To sustain the required amount of privacy and security, the following criteria will be met:

- Every stored data must be encrypted by our database provider Firebase, according to the ISO 27001, ISO 27017, and ISO 27018 standards.
- Passwords must be stored as hashed. The hashing may be done using the MD5 cryptography function.
- Any IPv4 address that sends more than 3 application forms (guide/tour/fair applications) in a minute must be blocked from accessing the website for 5 minutes.

3. Performance and Reliability

TOYS is an important tool that eases the lives of staff, guides, high school counselors, and students. In order to be as helpful as possible, it must be fast, reliable, and responsive.

Otherwise, usability would also drop, and many features may become practically unusable.

To prevent this from happening, the following criteria will be met:

- Tour/fair/guide application forms should not take longer than 2 seconds to load when there are less than 100 concurrent users.
- Any other page should not take longer than 6 seconds to load when there are less than 100 concurrent users.
- Create, Read, Update, and Delete operations on the database on the Tour, Guide, Advisor, Coordinator, and Head models must take less than 500 milliseconds when there are less than 100 concurrent users.
- For any operation, the website must be able to support 300 concurrent users. That is, no request sent to the server should fail due to high load as long as there are less than 300 concurrent users.
- Finite data like university name and role in the tour/fair application forms must be selected using drop-down menus to reduce the chance of accidental submission of invalid information
- E-mail addresses and phone numbers given in tour/fair/guide application forms must be checked by the server automatically. In case of an invalidity, the form submitter should be notified.

4. Compatibility

TOYS will be used by users through various different browser engines. Thus, it is important for our service to be compatible with as many environments as possible. To achieve this requirement, the following criteria will be met:

- The website must be completely compatible (that is, every provided functionality should be accessible) with Chrome 130.0, Firefox 132.0, Edge 130.0, and Safari 18.1 browsers.
- The user interface must be completely usable (that is, every provided functionality should be accessible, and the graphics and visuals must look as designed), with any screen size larger than 1440x720 pixels.

5. Maintainability

Hopefully, TOYS will be a long-term project used by Bilkent throughout the years. Thus, it will require constant development, making maintainability an important aspect. To sustain a high level of maintainability, the following criteria will be met:

- The backend is organized in relation to API endpoints in terms of folder and file structure.
- Backend classes must be documented using Java's Javadoc tool to improve the readability and usability of documentation.

5. Mockups
